

Flexagons

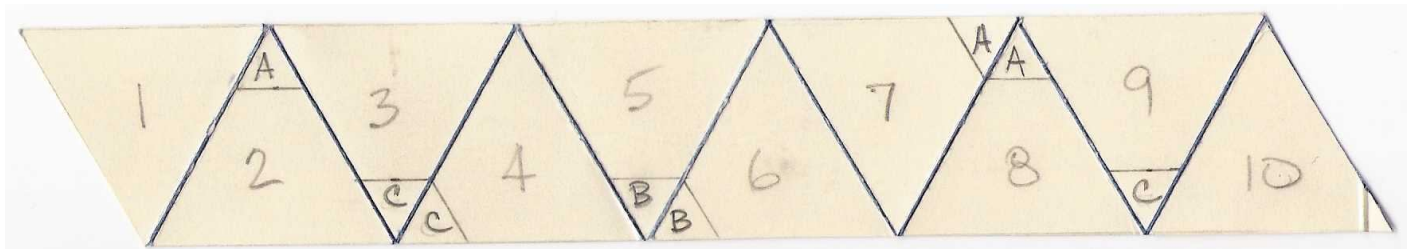

Making your flexagon

1. Trace fold lines and cut out flexagon.

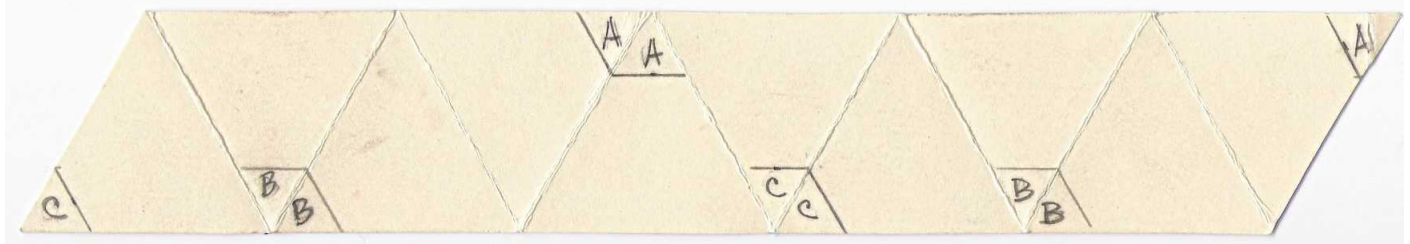

2. Fold along longest fold line and glue.

Front:

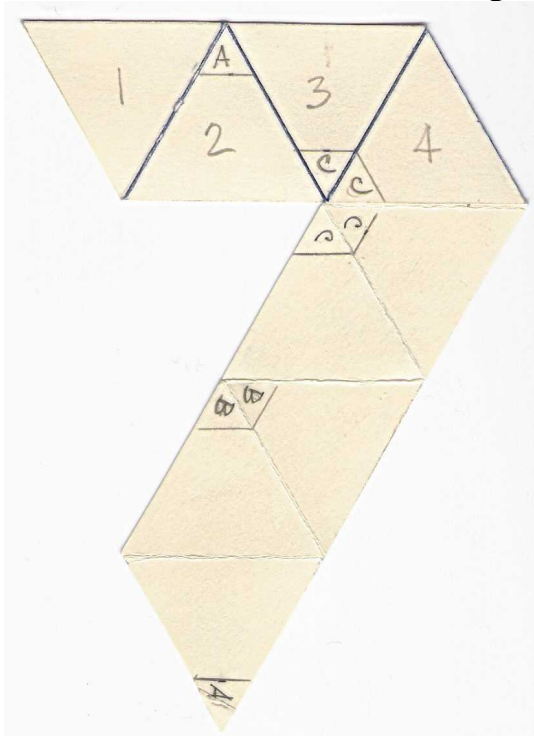

Back:

Color the "A"s one color, the "B"s a second color, and the "C"s a third color.

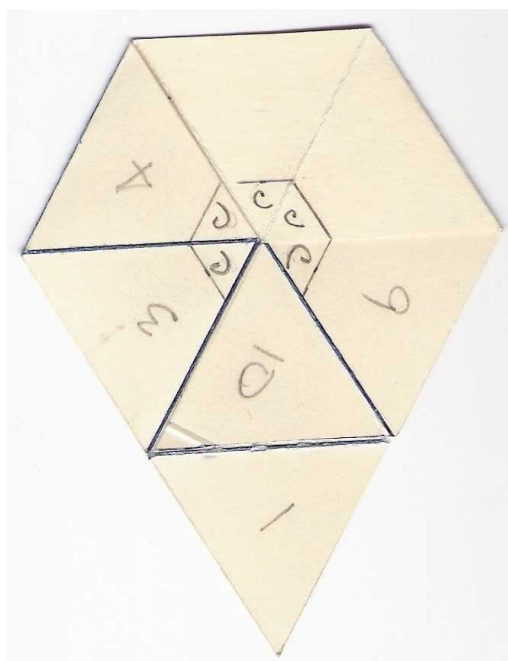

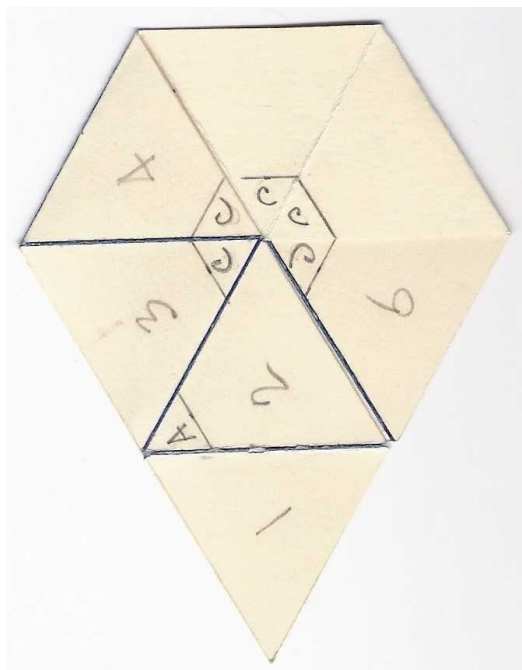

3. At fold line between triangle 4 and 5, fold 5 *under* 4.

← Fold here in step 4.

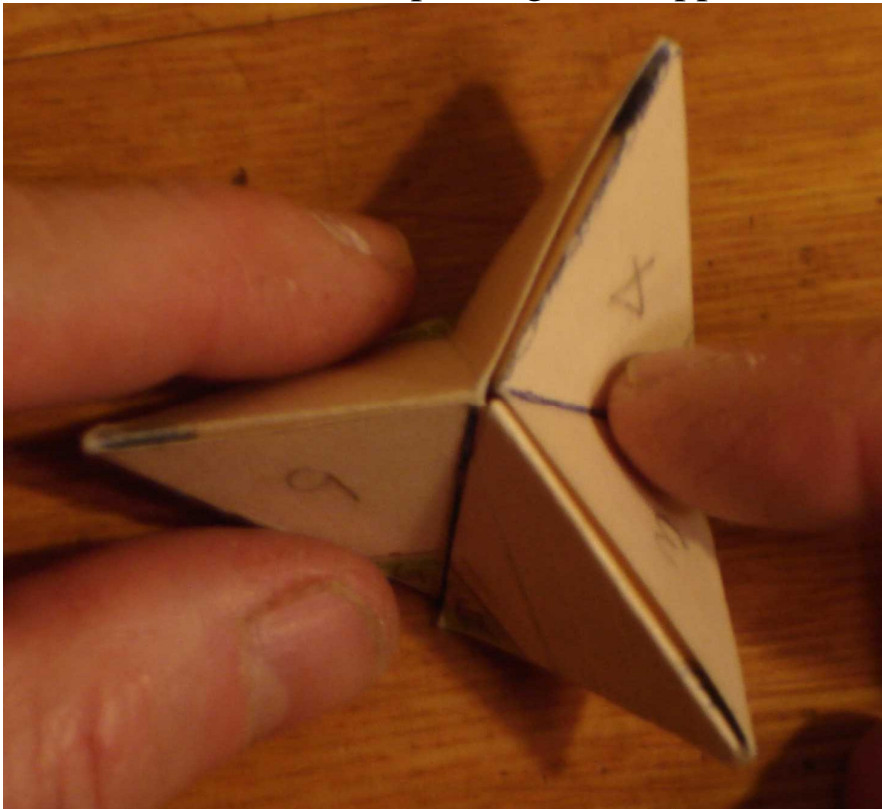

4. At fold line between triangle 7 and 8, fold 8 *under* 7.

5. Put triangle 10 *on top of* triangle 2.
Fold triangle 1 *over* triangle 10 and glue.

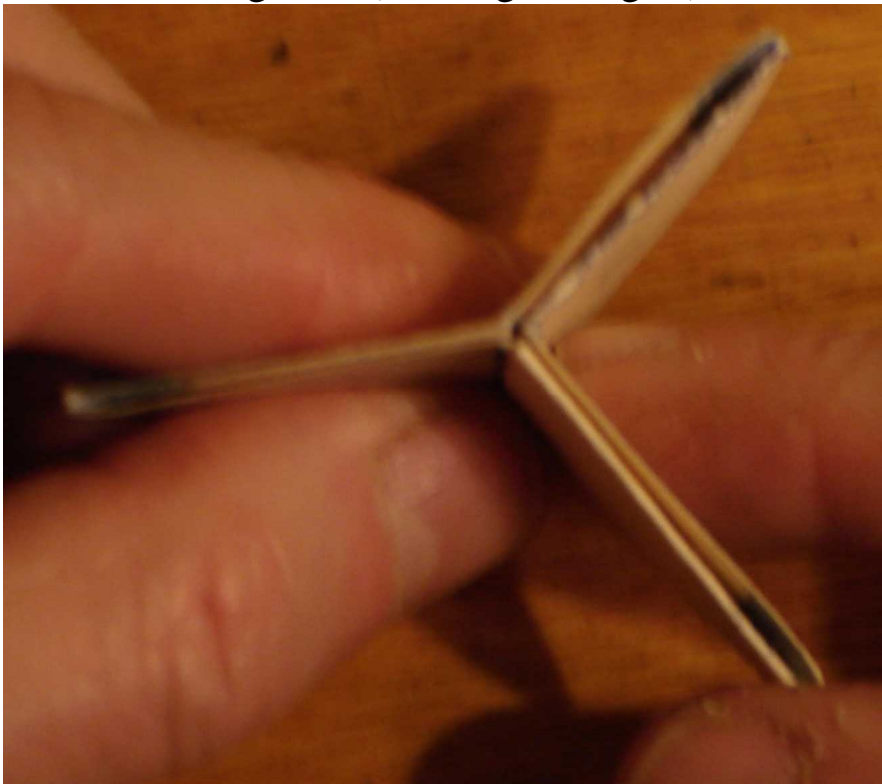

Operating your flexagon

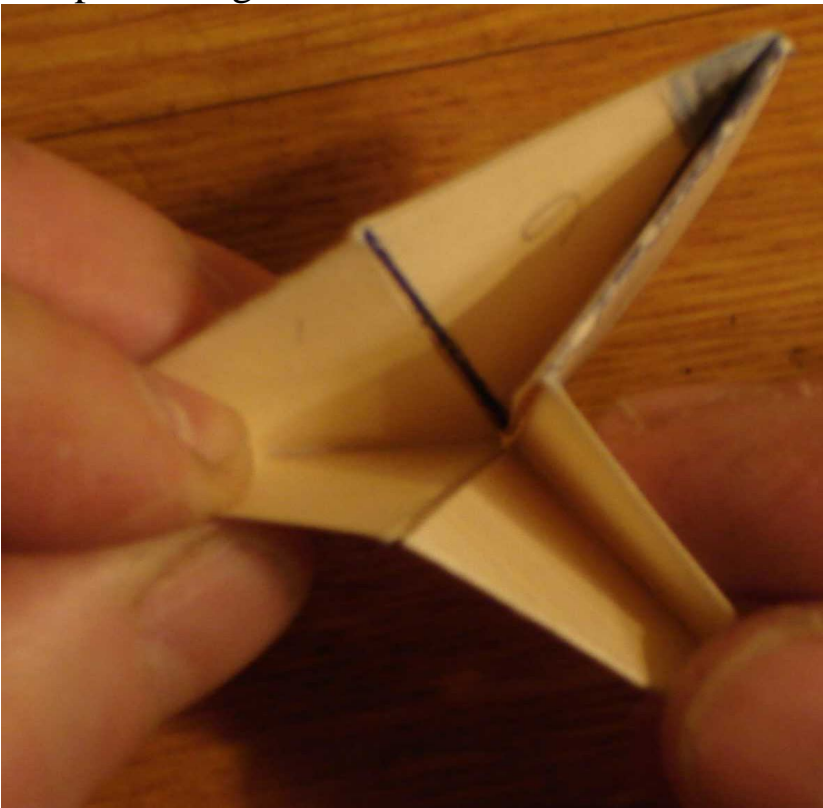

1. Pinch one side while pushing in on opposite side.

2. Make 3 congruent (120 degree angles).

3. Open flexagon from center out.

4. Flatten and repeat.
